

PROFESSIONAL SUMMARY

Mobile developer with 10+ years building Flutter apps that talk to hardware: NFC, BLE, UHF RFID, and Nordic DFU firmware updates. Have shipped 30+ production apps across Play Store, App Store, and enterprise channels, including a multi-tenant platform running 19 white-label client builds off one Flutter codebase. Worked across FinTech, Healthcare, Hospitality, Aviation, and Industrial Safety, and comfortable owning a product end to end: architecture, native Android in Java/Kotlin alongside Flutter, REST integration, Play Console releases, and staying on top of crashes and performance after launch.

TECHNICAL SKILLS

Mobile (Flutter)	Flutter 3.x, Dart 3, null safety, multi-flavor builds (19+), platform channels, isolates, deep linking, mobile + web	State Mgmt	GetX (primary), Provider, Bloc
Mobile (Native)	Android SDK, Kotlin, Java, Jetpack, Retrofit, Coroutines, Gradle, ProGuard/R8	Networking	Dio (interceptors, retries, auth refresh), HTTP, REST, JSON, dartz
Hardware & IoT	NFC (read/write), BLE, UHF RFID, Nordic DFU firmware updates, barcode/QR, camera, WiFi scan, geolocation	Backend & APIs	REST integration, Firebase (Auth, Firestore, FCM, Crashlytics, Analytics), SQL
Local Storage	Hive (+ hive_generator), SQLite, SharedPreferences, secure storage	UI / UX	Material 3, Cupertino, flutter_svg, fl_chart, graphview, animations, responsive (web + mobile)
Media & Docs	PDF generation & viewing, Excel import/export, digital signature capture, video/audio playback	Maps & Location	Google Maps (mobile + web), geolocation, route plotting
Architecture	MVVM, MVC, Clean Architecture, Repository pattern, DI, multi-tenant white-label, Industrial IoT	Tooling	Android Studio, VS Code, Git, Gradle, Play Console, App Store Connect

PROFESSIONAL EXPERIENCE

Senior Flutter DeveloperMay 2025 – May 2026

- AzuSol Global LLP, Delhi · Rejoined to sustain Arresto Connect and lead the ground-up Finance ERP build
- Kept Arresto Connect's 19 client flavors running across NFC, BLE, UHF RFID, and Nordic DFU hardware integrations.
 - The larger part of this role was leading a ground-up Finance & ERP platform in Flutter: 22+ feature modules, 43 data models, and role-based access across 6 permission tiers for B2B clients.
 - Built real-time fl_chart dashboards over paginated data (10K+ records, sub-second filtering), and standardized 30+ REST endpoints via Dio that cut API-related crashes by about 60%.

Flutter DeveloperApr 2024 – Apr 2025

- Questionlab Inc., Noida
- Owned Questionlab Vault end to end, a secure question-bank and assessment app for schools, and also built the client/supplier and bid-workflow pieces of Questionlab CRM.
 - Offline was a hard requirement for test centers, so client-side AES-256 encryption plus offline-first sync with Hive and background isolates went in to keep the app working with zero network access.
 - Dio interceptors handled auth refresh and retries across the REST layer, and centralized error handling cut API-related crashes by about 65%.

Flutter Developer

Jul 2023 – Mar 2024

Pansari Group, Delhi

- Took Pansari Direct from zero to Play Store launch: cart, checkout, payments, and order tracking.
- Razorpay went in across COD, UPI, card, and wallet flows, with retry and idempotency handling so a retried payment never double-charged.
- State ran on GetX as the primary manager, with Provider for language and search and Bloc for a few complex checkout flows; owned releases end to end, from Figma handoff through Play Console rollout and Crashlytics monitoring.

Android & Flutter Developer

Sep 2016 – Jun 2023

AzuSol Global LLP, Delhi

- Arresto Connect's biggest architecture challenge was running 19 white-label client flavors (Karam, Kratos, KStrong, Adani, Black & Decker, GTC, Aspliso, and 12 others) off a single Flutter codebase; owned the major modules that made that possible.
- Handled the hardware side in Flutter: NFC tag read/write for PPE asset tracking, BLE device communication, UHF RFID scanning, and Nordic DFU for over-the-air firmware updates.
- Led the native Android to Flutter migration over about 6 months, which cut cross-platform dev time nearly in half and moved releases from bi-weekly to weekly.
- Owned the native Android codebase in Kotlin and Java before the migration, and separately built the PDF inspection-report generator, digital signature capture, and Excel import/export tooling client safety teams relied on.

Android Developer

Sep 2015 – Aug 2016

Aayaam Software Pvt. Ltd., Delhi

- Built native Android apps in Java, with custom UI, SQLite for local storage, and Retrofit/OkHttp for REST, taking client projects from spec through to Play Store release.

KEY PROJECTS (PUBLISHED APPLICATIONS)

Arresto Connect — Industrial safety, 19 flavors, mobile + web (NFC/BLE/RFID/DFU) Play Store App Store	Finance ERP — Enterprise ERP (Flutter), mobile + web
Pansari Direct — D2C grocery e-commerce Play Store App Store	Questionlab Vault — Secure assessment (AES-256, offline)
Sandan Grading — Karate grading & assessment Play Store App Store	Karam Safety — Safety equipment asset management, QR/RFID tracking Play Store App Store
Compass (KStrong) — Fall protection equipment asset management Play Store App Store	RunPro — Task & project management, mobile + web Play Store App Store

Also shipped: ScanProx (LogoTrading), Questionlab CRM, Pansari Group App, QRresto, Karam Trainee, Kare (Karam), Nidan Grading, Tiska, Rate Ur Flight, ECAH, Cherry Hill, Graavaa, Karam Training, KDS Zotto, UValue Calculator, Vibic, Perfect Support.

EDUCATION

B.Tech in Computer Science — Uttar Pradesh Technical University, 2013
Intermediate — Uttar Pradesh Board, 2009
High School — Uttar Pradesh Board, 2006

ACHIEVEMENTS

- 30+ production apps shipped across Play Store, App Store, and enterprise channels.
- Standardized Dio-based error handling that brought API-related crashes down by roughly 65% across production apps.
- Moved release cycles from bi-weekly to weekly after a full Android-to-Flutter migration.
- Mentored junior developers and wrote the internal Flutter conventions that stuck across multiple projects.
