

PROFESSIONAL SUMMARY

Senior Mobile Developer (10+ years) specializing in hardware-integrated Flutter apps — NFC, BLE, UHF RFID, and Nordic DFU firmware updates. Shipped 12 production apps across Play Store, Amazon Appstore, and enterprise channels — including a multi-tenant Flutter platform serving 19 white-label client deployments from a single codebase. Domains include FinTech, Healthcare, Hospitality, Aviation, and Industrial Safety. Comfortable owning a product end-to-end: architecture, native Android (Java/Kotlin) and Flutter, REST integration, Play Console release, and post-launch crash and performance ownership.

TECHNICAL SKILLS

Mobile (Flutter)	Flutter 3.x, Dart 3, null safety, multi-flavor builds (19+), platform channels, isolates, deep linking, mobile + web	State Mgmt	GetX (primary), Provider, Bloc
Mobile (Native)	Android SDK, Kotlin, Java, Jetpack, Retrofit, Coroutines, Gradle, ProGuard/R8	Networking	Dio (interceptors, retries, auth refresh), HTTP, REST, JSON, dartz
Hardware & IoT	NFC (read/write), BLE, UHF RFID, Nordic DFU firmware updates, barcode/QR, camera, WiFi scan, geolocation	Backend & APIs	REST integration, Firebase (Auth, Firestore, FCM, Crashlytics, Analytics), SQL
Local Storage	Hive (+ hive_generator), SQLite, SharedPreferences, secure storage	UI / UX	Material 3, Cupertino, flutter_svg, fl_chart, graphview, animations, responsive (web + mobile)
Media & Docs	PDF generation & viewing, Excel import/export, digital signature capture, video/audio playback	Maps & Location	Google Maps (mobile + web), geolocation, route plotting
Architecture	MVVM, MVC, Clean Architecture, Repository pattern, DI, multi-tenant white-label, Industrial IoT	Tooling	Android Studio, VS Code, Git, Gradle, Play Console, App Store Connect, Amazon Appstore

PROFESSIONAL EXPERIENCE

Freelance Flutter & Android Developer

Self-Employed, Remote | May 2026 – Present | Currently working

- Delivering Flutter and native Android consulting — architecture reviews, hardware-integration prototypes (NFC, BLE, UHF RFID), and end-to-end feature builds through Play Console rollout.
- Advising clients on state management (GetX), offline-first sync with Hive, and Dio-based networking patterns adopted from production multi-tenant deployments.

Senior Flutter Developer

Arresto Connect, Delhi | Apr 2026 – May 2026 | Post-merger continuation from AzuSol Global LLP

- Continued development and maintenance of Arresto Connect industrial safety platform following AzuSol–Arresto Connect merger — sustaining 19 white-label client flavors from a single Flutter codebase.
- Maintained NFC, BLE, UHF RFID, and Nordic DFU hardware integrations; supported post-merger platform stabilization and client deployments.

Senior Flutter Developer

AzuSol Global LLP, Delhi | May 2025 – Apr 2026 | Rejoined to lead the ground-up Finance ERP build

- Led development of enterprise Finance & ERP platform in Flutter — 22+ feature modules (sales, purchase, quotations, inventory, vehicle scanning, reporting) with 43 data models serving B2B clients.
 - Designed role-based access control with 6+ permission tiers (Super Admin, Admin, Manager, Sales, Purchase, View-only), cutting client onboarding configuration time by ~70%.
 - Built real-time dashboards with `fl_chart` and server-side paginated data sources, handling 10K+ invoice/quotation records with sub-second filtering.
 - Integrated barcode/QR scanning for warehouse lot tracking, cutting manual entry from ~3 min to under 20 seconds per shipment.
 - Standardized 30+ REST endpoints via Dio with centralized error handling, reducing API-related crashes by ~60%.
-

Flutter Developer

Questionslab Inc., Noida | Apr 2024 – May 2025

- Owned end-to-end development of Questionslab Vault — secure question-bank and assessment app for educational institutions.
 - Implemented client-side AES-256 encryption for sensitive content, passing internal security review on first audit.
 - Built offline-first sync with Hive and background isolates, enabling full functionality with zero network dependency on test-center deployments.
 - Integrated 15+ REST endpoints with Dio interceptors for auth refresh, retries, and centralized error handling — reducing API-related crashes by ~65% (Crashlytics).
 - Optimized cold-start time and APK size through deferred service init and lazy GetX controllers; consistently shipped releases with >99.5% crash-free users.
-

Flutter Developer

Pansari Group, Delhi | Jul 2023 – Apr 2024

- Built Pansari Direct — D2C grocery e-commerce app — from zero to Play Store launch, covering cart, checkout, payments, and order tracking.
 - Integrated Razorpay with retry and idempotency handling across COD, UPI, card, and wallet flows; achieved consistent transaction success on production traffic.
 - Architected state with GetX (primary) and Provider (for language & search context); maintained 60 FPS on product listings of 500+ SKUs via `ListView.builder` and image caching.
 - Implemented deep linking for product, category, and promotional URLs to support marketing-campaign funnels.
 - Owned full release lifecycle — Figma → development → Play Console rollout → Crashlytics monitoring — across multiple feature releases with zero production rollbacks.
-

Android & Flutter Developer

AzuSol Global LLP, Delhi | Sep 2016 – Jun 2023

- Scaled and architected major modules of **Arresto Connect** — a multi-tenant industrial safety compliance platform supporting **19 white-label client flavors** (Karam, Kratos, KStrong, Adani, Black & Decker, GTC, Aspliso, and 12 more) from a single Flutter codebase, eliminating large amounts of per-client maintenance overhead.
- Integrated industrial hardware in Flutter: **NFC** tag read/write for PPE asset tracking, **BLE** device communication, **UHF RFID** scanning, and **Nordic DFU** for over-the-air firmware updates.
- Owned the native Android codebase (Kotlin + Java) pre-migration and authored Kotlin platform-channel bridges (`MethodChannel`, `EventChannel`) connecting Flutter to native hardware (NFC, BLE, UHF RFID, Nordic DFU).
- Optimized APK/AAB size and cold-start through ProGuard/R8 shrinking and lazy initialization; triaged native ANRs and JNI crashes via Crashlytics, holding crash-free rate above 99%.
- Led native Android → Flutter migration over ~6 months, cutting iOS+Android feature-parity development time by roughly half and shortening release cycles from bi-weekly to weekly.
- Built PDF inspection-report generator, digital signature capture, and Excel import/export, eliminating multi-hour manual reporting workflows for client safety teams.

- Integrated payment gateways (Razorpay, Stripe) and Firebase services (Auth, Firestore, FCM, Crashlytics, Analytics) across FinTech and Hospitality apps; shipped 10+ production apps across FinTech, Healthcare, Hospitality, and Aviation domains.

Android Developer

Aayaam Software Pvt. Ltd., Delhi | Sep 2015 – Aug 2016

- Built native Android apps in Java with custom UI, SQLite local storage, and REST integration; delivered client projects end-to-end from spec to Play Store release.
- Implemented Retrofit + OkHttp REST clients, fragment-based navigation, Material Design components, and AsyncTask/handler-based background work across multiple client app releases.

KEY PROJECTS (PUBLISHED APPLICATIONS)

1. Arresto Connect Industrial safety, 19 flavors (NFC/BLE/RFID/DFU)	2. Finance ERP Enterprise ERP (Flutter)
3. Pansari Direct D2C grocery e-commerce	4. Questionslab Vault Secure assessment (AES-256, offline)
5. RunPro Task & project management	6. Karam Trainee PPE inspection & training verification
7. Rate Ur Flight Aviation review & rating	8. ECAH Healthcare appointment booking
9. Kare (Karam) Workforce & training management	10. Cherry Hill Task & project management
11. Sandan Grading Karate grading & assessment	12. Graavaa Product catalog app

EDUCATION

B.Tech in Computer Science — Uttar Pradesh Technical University, 2013

ACHIEVEMENTS

- Shipped 12 production apps across Play Store, Amazon Appstore, and enterprise channels.
- Architected single-codebase multi-tenant platform serving 19 white-label client deployments.
- Shipped production hardware-integrated mobile features in Flutter — NFC, BLE, UHF RFID, and Nordic DFU firmware updates.
- Led successful native Android → Flutter migration of an enterprise product line, cutting cross-platform development time by ~50%.
- Mentored junior developers and documented internal Flutter conventions adopted across multiple projects.
